CONTENTS

the metamorphosis
of four years
unsuspected
we arrived
each harboring a secret
expectant dream
of the future
none actually knowing . . .

. . . and this city

became our home

and the recipient

of our varied

wanderings

During the four years of sometimes trauma now behind us, we have had the experience of knowing change. When we entered this preparation for service to man we had many erroneous beliefs, witchcraft thoughts and illusions, born of ignorance and of dreams of what medicine would be. Most of the poetry of these past thoughts has not been dispelled, but the salt of common sense and down-to-earthness has been liberally added,

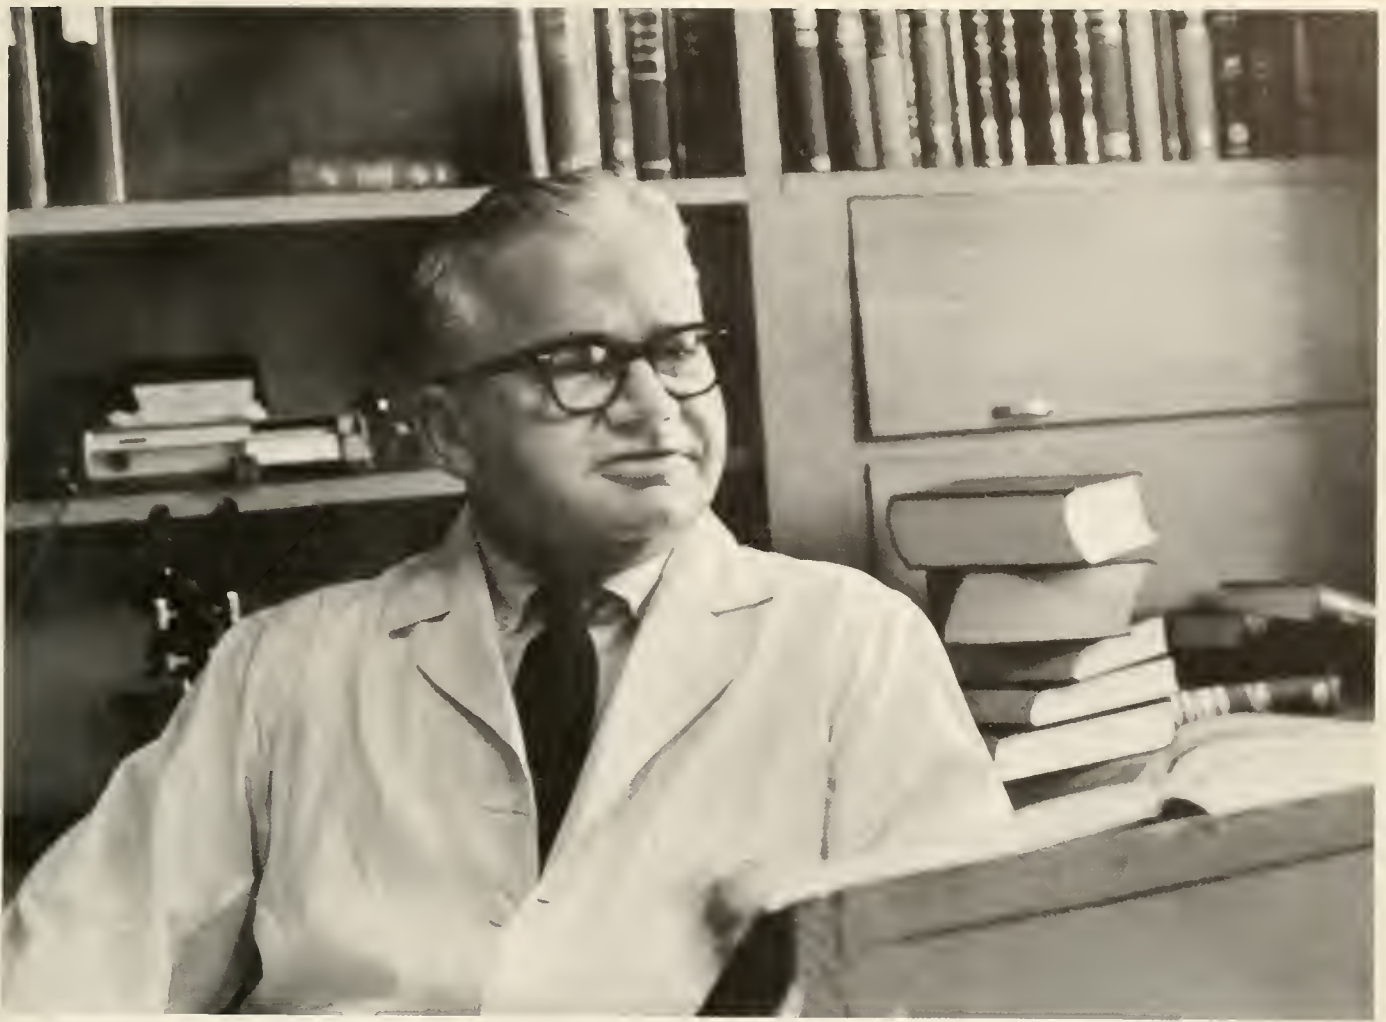

In the classrooms we learned to look for the simple, the unembellished, the obvious, and through the diligence of our teachers some of us will do this.

On the wards and in the clinics we have put our basic teachings to the test and, if not learned to cure, learned to help.

We have learned to cope with the infiniteness of even the most meagre of minds, and we have learned that people are human.

With the medicine, we have learned respect; for ourselves, our peers, our superiors and subordinates, and this is all important, for without it we are not physicians.

j. b. s.

Doctor ROBERT P. MOREHEAD was graduated from Wake Forest College in 1931 and 1932, receiving B.S. and M.A. degrees. He obtained the M.D. degree from Jefferson Medical College in 1936 after having attended the Wake Forest School of Medicine for his pre-clinical training. In 1937 he joined the staff of the School of Medical Sciences here as Instructor in Pathology. He is now chairman of that department and Professor of Pathology. He has written some sixty papers and has two books and numerous articles in process.

His honors comprise a long list and to it we humbly add this dedication.

Truly a professor, Doctor Morehead has busied himself with the practice of his art, teaching, research and administration. With all of this we have found him accessible and have gained through his counsel.

In the classroom he has mixed the didactic with the nonchalant and humorous. He has taught us the commonplace and the prodigious.

We will not soon forget "intermediate tumors" or "Moose" Morehead and it is our pleasure to give him this book.

birth . . .

sometime in the past

a thought to the future

led us to this door,

and we entered

as children . . .

. . . and at first

we saw nothing

but coldness

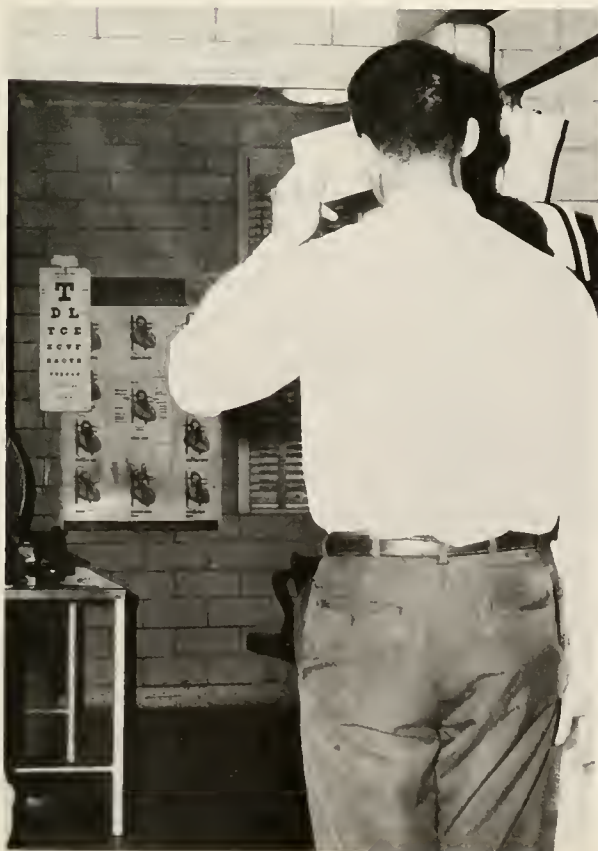

and austerity

in these buildings.

not exactly knowing
why certain things
were done
we began
this long
long labor . . .

. . . and at the onset

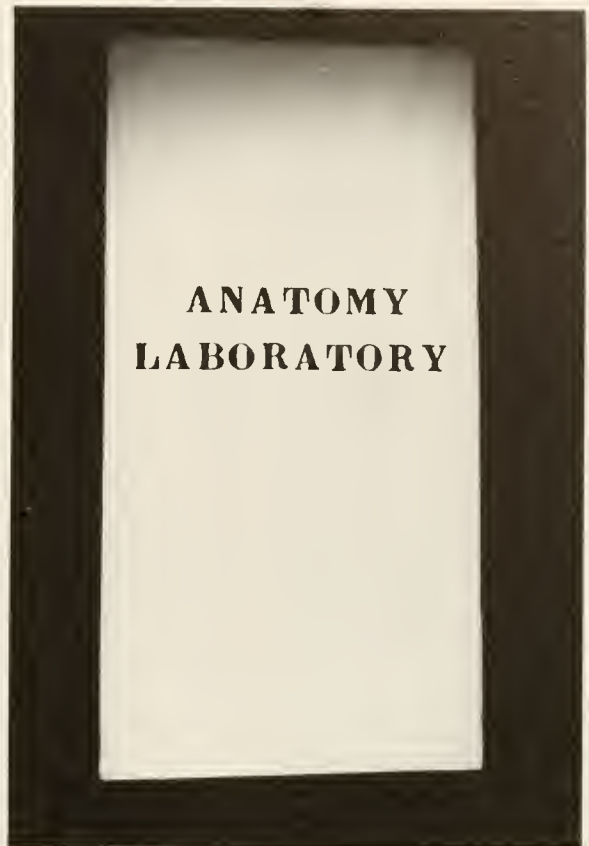

there were many doors

to open

and many doors

to find . . .

. . . and after months

of watching, feeling

listening . . .

. . . we are still

in trying

but early

stages . . .

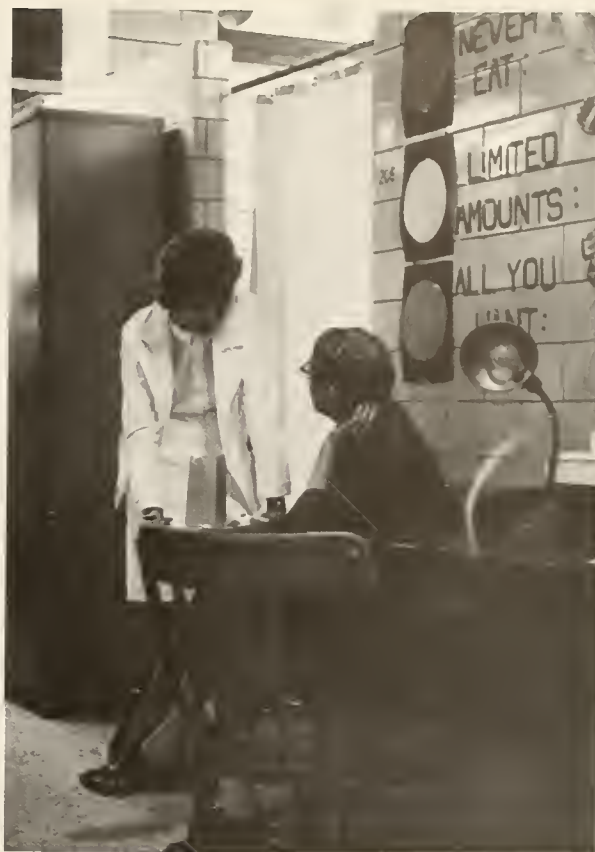

. . . but time goes fast.

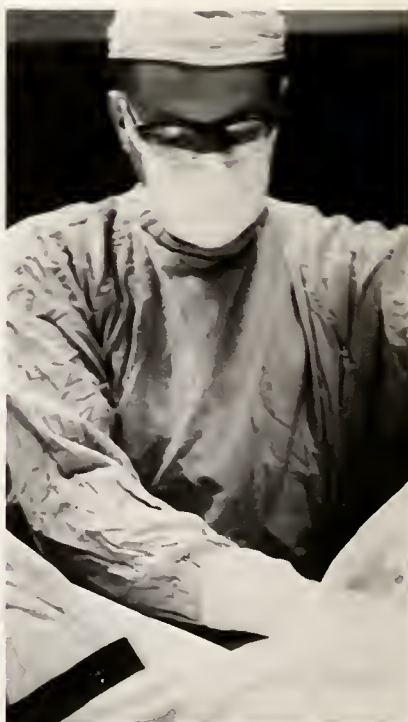

and rarely

stops . . .

. . . and quickly, often painfully . . .

... we learn this art

and begin to practice it.

The local chapter of the STUDENT AMERICAN MEDICAL ASSOCIATION has, through the years, been active in bringing lectures and programs of interest to the student body, SAMA has also been an effective and necessary instrument in shaping and maintaining good relations between the students and the administration and faculty. A political organization, SAMA helps in the education of medical students in the ways of organized medicine and aids in preparing men of medicine for future positions and activities.

SAMA OFFICERS, 1964-1965: Bates Noble, president; Al Boker, vice-president; Pete Rowe, secretary; and Bill Wallace, treasurer.

THE FLORENCE NIGHTINGALE PLEDGE

"I solemnly pledge myself before God and in the presence of this assembly to pass my life in purity and to practice my profession faithfully. I will abstain from whatever is deleterious and mischievous and will not take or knowingly administer any harmful drug. I will do all in my power to maintain and elevate the standards of my profession and will hold in confidence all personal matters committed to my keeping and all family affairs coming to my knowledge in the practice of my profession. With loyalty will I endeavor to aid the physician in his work and devote myself to the welfare of those committed to my care."

—Lystra Gretter

Graduation . . . happiness . . . fear . . . goal attained . . . a graduate . . .

Surveying village health needs, an SK&F Foreign Fellow examines a child in Kurali, near New Delhi, India.

- INDIA...** At hospitals and medical outposts a long way from the classroom, medical students learn to cope with unfamiliar diseases; help to provide much-needed medical services to people in underdeveloped areas of the world; and contribute to international understanding and good will.
- TANGANYIKA...**
- IRAN...**
- GUATEMALA...** This unusual opportunity to work and study in foreign countries is offered to students through the Foreign Fellowships Program of Smith Kline & French Laboratories. Administered by the Association of American Medical Colleges, the program has enabled 123 students to work in 40 different countries during the past four years. Junior and senior medical students are eligible to apply for Fellowships, which provide for an average of 12 weeks' work abroad to be completed before internship.

Students who are interested in Fellowships should apply through the deans of their schools.

FEATURING
effective ULTRASONIC THERAPY

UT-400 unit

The Burdick UT-400 produces a combination of thermal, mechanical, and chemical effects in tissue not possible with any other modality. Where both heating and mechanical effects are desired, the UT-400 provides continuous ultrasound energy. Where a greater proportion of mechanical effect to thermal is indicated the UT-400 unit provides pulsed energy. Effective dosage is well below the pain threshold — any sensation of pain serves as a warning of overdosage before tissue damage can occur. The UT-400 is especially recommended for treating acute or chronic conditions of osteoarthritis, capsulitis, myositis, bursitis, fibrositis, and periarthritis. Your practice requires this modern, effective therapeutic device.

do you know . . .

that you are graduating into one of the most promising areas of the nation? A recent urban research study forecast "a linear city" for the 300 square miles stretching through the industrial Carolinas. Here, in the 20,00 square miles served by Duke Power, scores of thriving towns connect busy cities. Research centers, colleges and universities, and hundreds of industries thrive.

Here in the Carolinas Crescent, there is real challenge and opportunity. There is a place for you to fill, a job for you to do, in an exciting future that begins—**right now.**

A PRODUCT OF

Hunter Publishing
COMPANY

333 INDIANA AVENUE
WINSTON-SALEM, N.C.

A black and white photograph of a brick building. In the upper center, there is a window with horizontal blinds. Below the window, a dark rectangular sign with the words "EMERGENCY ROOM" in white, bold, sans-serif capital letters is mounted on the brick wall. To the left of the sign, there is a doorway. In the foreground, a large, dark, leafy bush or small tree is on the right side, partially obscuring the view of the building. A concrete walkway leads from the bottom left towards the building's entrance. The overall image has a grainy, high-contrast quality.

EMERGENCY ROOM
